

FAQ's - Masonry Type N - Gray

What is the product description?

Produces a durable mortar with excellent bonding ability and has been proven to be an exceptional masonry cement for general-purpose masonry construction.

What are the specifications?

Masonry Cement is a high quality cement produced to comply with ASTM C91.

What are the complementary/accessory products?

Water shall be potable and free of any substance that would adversely affect the hardened masonry or any metal used in the system.

What is the product technical information?

To achieve the desirable qualities for Masonry Cement, the sand must comply with requirements outlined in ASTM C 144 or other governing codes.

Proportion and mix in accordance with ASTM C 270 procedures, or other applicable codes. Recommended mixing time is 5 to 8 minutes.

What is the occupational health information?

Avoid prolonged contact with skin. Wash affected areas with soap and water.

What are the product benefits?

By proper proportioning of this masonry cement with sand, the strength requirements for ASTM C270 Type N mortar can be obtained.
