

STUCCO – FAQ's

What is the Product Description?

Rapid setting concrete mixture used when early strength is required.

What are the Uses/Applications?

Cold weather placements, tight scheduling requirement projects, reduced finishing projects as needed, pavement repairs.

What are the Specifications?

ASTM C-94, ASTM 494, Applicable DOT Specifications

What are the Complementary/Accessory Products?

Concrete tools and trowels, safety equipment (hard hats, eyewear, hearing protection and gloves).

What are the Product Benefits?

Accelerated set concrete stiffens and strengthens faster than normal concrete. This reduces finishing time, allows for earlier removal and/or allows traffic on to pavements sooner.
