OUR VOICE USA

BUILDING A BETTER FUTURE FOR THE UNITED STATES OF AMERICA

Clayton Quarry
California
IGNACIO MADRIDEJOS
CEMEX USA PRESIDENT

"CEMEX USA STRIVES FOR EXCELLENCE IN EVERYTHING WE DO, AND 2016 HAS BEEN NO EXCEPTION. MOVING FORWARD, WE’LL CONTINUE TO BUILD ON OUR SUCCESSES BY RECOMMITTING OURSELVES TO THE HEALTH AND SAFETY OF OUR PEOPLE, MAKING CUSTOMER CENTRICITY OUR PASSION, RETURNING OUR COMPANY TO INVESTMENT GRADE AND RELENTLESSLY PURSING OPERATIONAL EXCELLENCE AS ONE GLOBAL CEMEX."

USA RESULTS

In the United States, our domestic gray cement, ready-mix and aggregates volumes increased in the first quarter of 2016 by 8, 5 and 6, respectively, as compared to the same period last year. Volume growth during the quarter was due to a pickup in residential and infrastructure activity, as well as good weather in most of our portfolio relative to the prior year. In the residential sector, housing starts increased 15% year-to-date March. Driven by low inventories, job creation and household formation. Similar to the fourth quarter of last year, single-family construction growth outpaced multi-family. The infrastructure sector reflected a pick-up in highway- and-bridges construction spending in the first two months of the year. Construction spending in the industrial-and-commercial sector including energy has slowed over the last year reflecting a headwind from energy and manufacturing investment. Spending in this sector is up 3% year-to-date February, reflecting growth in the more cement intensive lodging, office and commercial segments.

OUR SHAREHOLDERS

Health & Safety
Our ultimate goal for Health & Safety is Zero4Life; we’ll achieve this goal by reducing our LT1 rate across our U.S. operations. We will also improve our health through annual physicals, smoking cessation, balanced diet and regular exercise.

Customer Centricity
Our vision is to establish value for our customers and company through exceptional quality and service. We’ll achieve this goal by communicating with our customers; delivering on promises; understanding relationships are built on trust; quickly assessing and resolving problems as they arise; and following the four principles established in our Commercial Model: what are our objectives, where to play, how to win and what to do.

Return to Investment Grade
We will return our company to investment grade by improving our EBITDA, achieving ZERO working capital days, optimizing our asset base and improving relationships with communities by building local engagement plans.

Work as One Global CEMEX & Pursue Operational Excellence
We will improve our results by empowering our employees to identify and eliminate waste from all our processes.

HAND INJURY CAN BE CAUSED BY:
• Working with machinery or equipment
• Jobs or processes including hazardous materials or chemicals
• Exposures to cut or abrasion hazards (handling chutes, truck ladders, pipe cages, etc.)
• Defective or improperly used powered hand tools
• Carelessness
• Lack of training & awareness
• Disregard for Personal Protective Equipment (Gloves) and safety procedures

Stop. Think. Then... Act Safely.

DO YOU PRACTICE THE SAFETY ESSENTIALS?

Best Wishes, Bob Capasso

Bob Capasso, Vice President – Business Services Organization, has retired after 24 years with CEMEX USA. Bob started with Rinker as a cement controller, then went into the materials group and spent time in acquisitions before moving into and leading the BSO. Though his career accomplishments are many, Bob says his proudest achievement was during an organizational transformation in 2011. That’s when he and his team brought together a world-class shared-service organization. Please join us in thanking Bob for all his contributions and wishing him all the best!

Meet our new VP — Business Services Organization

German Carmona joined CEMEX in 2004 and has held multiple positions, including Vice President Continuous Improvement and Commercial Excellence, Vice President Commercial Strategy, Vice President Aggregates and Mining Resources, Global Director of Organization and Compensation/GLOBAL Director of HR Planning, Corporate Project Leader for the US Integration in the Rinker Acquisition, Corporate Project Leader for the US Integration in the RMC Acquisition and Corporate Director of Human Capital for the Mexico Business Unit. In his new role, German plans to continue building an efficient and customer-oriented department. He says he’s honored to lead such an outstanding team.

We are rolling out an action plan based on the engagement survey results. This involves better recognizing long-time employees and improving two-way communications. Engaged employees have a stake in the success in the organization; this drives a safer workplace and facilitates a real desire to contribute to continuous improvement.

Eric Wittman
President, West Region

Our People

President, West Region

Our People

Safety

The second quarter safety spotlight was on hand protection. Hand injuries account for nearly 25% of the recordable injuries at CEMEX USA. Looking after your hands involves many things, among them the proper use of PPE. Whether you are at work, or at home, keep your hands safe.

It’s in your hands!

Work safely to prevent hand injuries.

Hand injury can be caused by:
• Working with machinery or equipment
• Jobs or processes including hazardous materials or chemicals
• Exposures to cut or abrasion hazards (handling chutes, truck ladders, pipe cages, etc.)
• Defective or improperly used powered hand tools
• Carelessness
• Lack of training & awareness
• Disregard for Personal Protective Equipment (Gloves) and safety procedures

Stop. Think. Then... Act Safely.

Do you practice the safety essentials?

Safety

Energy isolation procedures
Never work on energized equipment. Always lock out, tag out and try out.

Housekeeping
Keep walkways, access routes and work areas free from slip, trip and fall hazards.

Manual handling
Use mechanical aids or ask for help to reduce risks.

Safety...
OUR PEOPLE WHO ARE LIVING OUR VALUES

Get Started on your 2016 CEMEX Wellness Program Actions

At CEMEX, nothing is more important than the health and safety of the employees.

Now it is time to maintain or improve your health by taking the health assessment and completing an annual physical exam.

Good news! You no longer need to complete a Health Care Provider Form. To avoid the 2017 medical plan surcharge, you and your covered spouse need to complete these steps:

Health Essentials

Drug Awareness

Drugs and alcohol can impair your judgment and endanger you, your co-workers and your family. Don’t let them ruin your life.

Prevent Stress

Be aware of stress and recognize its signs in your life. Seek advice early if needed. Be aware of those around you.

Protect Your Skin

Take care when exposed to chemicals or sunlight. Practice good hygiene and protect your skin. Cover your head and skin in the sun and use sunscreen.

“Don’t look at exercise as something you have to do — look at it as something good you’re choosing to do for yourself. Make it a priority, work it into your schedule and before you know it, it will be a habit!”

- Steve Small, CEMEX USA Shared Services

Health & Wellness Success Story

Steve Small of CEMEX USA Shared Services says he never thought of himself as an athlete in high school or college. But that all changed in 2002 when, inspired by a coworker who was training for a marathon, he signed up for his first 5K. He spent a year training for that race, and when he crossed the finish line, he knew he was hooked on running. Now, Steve has run four marathons!

Our Values make up the essence of our culture. They express who we are, how we behave, and what we believe in. These are the values that guide us: Ensure Safety, Focus on Customers, Pursue Excellence, Work as One CEMEX, Act with Integrity.

Ron’s dedication to teamwork has helped our Ready-Mix plants become more energy efficient.

Kim is an amazing HR Business Partner who always makes sure both the employee and the Company are being treated fairly and all are acting in the best interests of the Company at all times.

THE PIPE TEAM HAS HAD A GREAT START TO THE YEAR WITH HELPING TO PUSH FOR OUR GOAL OF ZERO 4 LIFE.

- JUAN CARLOS HERRERA
EVP, STRATEGIC PLANNING AND CONCRETE PIPE SAFETY

SAFETY SPOTLIGHT: HAND PROTECTION

All CEMEX employees should consider gloves as part of their standard PPE - just like a hard hat, safety glasses, steel toe shoes and high visibility clothing. Protecting your hands from injury requires you to be proactive. There are a variety of gloves available depending on the job at hand.

“HEALTH & SAFETY IS A CORE VALUE AT CEMEX. THANK YOU FOR YOUR COMMITMENT TO WORKING SAFELY ON - AND OFF THE JOB.”
- DR. HUGO BOLIO, EVP, CEMENT OPERATIONS AND TECHNICAL

“THE PIPE TEAM HAS HAD A GREAT START TO THE YEAR WITH HELPING TO PUSH FOR OUR GOAL OF ZERO 4 LIFE.”

SALESFORCE TOWER
The Salesforce Tower in San Francisco will be the Golden Gate City's tallest building. A towering, 61-story, 1.4 million square-foot marvel, it will feature advancements in engineering and technology that actually allow it to “breathe” outside air through specially designed intakes on each floor. More than 130 ready-mix trucks from the San Francisco, Berkeley and Oakland plants expertly navigated the square-block mat pour site over 18 hours, pouring 7,300 of the approximately 12,000 cubic yards of concrete required for the job. It was the second-largest mat pour in San Francisco's history.

GROVE AT GRAND BAY
The Grove at Grand Bay residential towers have sparked a transformation of Miami’s eclectic Coconut Grove neighborhood. These twin, twisting structures designed by internationally renowned architect Bjarke Ingles (BIG) and built by Facchina are a breathtaking, unique addition to the bayfront skyline that required an equally unique concrete. CEMEX created a custom blend specifically for this project using special aggregates from multiple locations outside of the Miami area. The project required more than 7,200 loads of custom concrete to be delivered over a two-year period, primarily serviced out of the South Miami Plant.

OUR CUSTOMERS
“OUR CUSTOMERS ARE AT THE CENTER OF EVERYTHING WE DO, AND THESE PROJECTS EXEMPLARY OUR COMMITMENT TO PROVIDING TOP-QUALITY SERVICE AND PRODUCTS FOR INDUSTRY-LEADING PROJECTS.”
- IGNACIO MADRIDEJOS, CEMEX USA PRESIDENT

OUR PEOPLE
DAVID MANGOLD
The National Ready-Mixed Concrete Association (NRMCA) has recognized a member of the CEMEX family as one of the top ready-mix concrete delivery drivers in the country. David Mangold, a 22-year veteran driver out of Cocoa, Fla., who’s been with CEMEX for 33 years, was one of two runners-up in the 2016 competition. A panel of industry judges selected the winners from a pool of national applicants. The winners were chosen for their outstanding career achievements, safety records, professionalism, driving competency and customer-service skills. Way to go, Dave!

TONY CARDENAS
Please join us in wishing a happy retirement to a fixture in our Texas/New Mexico region, Senior Territory Sales Manager Tony Cardenas. Tony has been with CEMEX USA for 14 years and has played a pivotal role in some of the region’s biggest and most challenging projects. Tony says he’s looking forward to traveling with his wife and fishing in retirement, but he’ll miss getting to see his coworkers every day. Best of luck, Tony! Thanks for 14 outstanding years of service!

FLORIDA REGION HOLDS ANNUAL MEETING
The 2016 Florida Region Annual Meeting was a huge success! Thanks to all of our organizers for putting on a fantastic event, Regional President Gonzalo Galindo for hosting and CEMEX USA President Ignacio Madridejos for delivering closing remarks. It was a great opportunity for one of our key US regions to network, share best practices, plan for the upcoming year and recognize some of Florida’s top facilities and individual performers. Big congrats to Florida Region Plant of the Year Palmetto Block, Most Improved Plant Grant Street Ready-Mix and all of the other winners and honorees!

NORTH FLORIDA BLOCK WINS CEMEX SAFETY AWARD
Congratulations are in order for Casey Jones & our North Florida Block Team (Bushnell, Davenport, Zephyrhills, Land O Lakes/Ehrens Cutoff and Jacksonville Block Plants)! They received a coveted CEMEX Global Health & Safety Award, earning “3rd Place – Most Improved” honors. Excellent work!

GROVE AT GRAND BAY
The Grove at Grand Bay residential towers have sparked a transformation of Miami’s eclectic Coconut Grove neighborhood. I-405 ENHANCEMENT - WASHINGTON

CEMEX USA recently helped ease traffic congestion in the Bellevue-Kirkland-Bothell areas of Washington State by expanding and enhancing 17 miles of I-405. As part of this project, we provided materials to add new lanes, alter existing lanes, widen shoulders and installed a “braided” ramp system for efficient freeway access.

THE TREEHOUSE - TEXAS

The Treehouse, the 14,700-square-foot home office of Houston real-estate company MetroNational, is a unique, collaborative, sustainable workspace that was designed to achieve LEED Platinum certification—the highest rating possible. Technologically advanced and environmentally sound, it features flexible, casual work stations, meeting spaces and a rooftop garden. We’re proud to have been a part of building the “office of the future” in the Lone Star State!

PURPLE LINE - CALIFORNIA

CEMEX USA is supplying concrete for Phase 1 of the long-awaited Metro Purple Line Extension, which will connect West Los Angeles to the region’s growing rail network and provide a high-speed, reliable way for people to travel to and from popular areas like Miracle Mile, Beverly Hills, Century City and Westwood.

FAKA UNION PUMP STATION - FLORIDA

The Faka Union Pump, which was built using more than 30,000 cubic yards of CEMEX concrete, is designed to pump 2,630 cubic feet of water per second. It was built as part of the Picayune Strand Restoration Project—one of the first phases of the Comprehensive Everglades Restoration Plan.

Twelve Texas ready-mix plants were recognized for achieving the EPA Energy Star Challenge for Industry at an awards presentation at the CEMEX Texas/New Mexico Regional Office on April 4. More than 50 CEMEX team members, local leaders, customers and friends were on hand for the event, which was hosted by Regional President Scott Ducoff. The 12 plants that met the challenge are: Arcola, Cutten, Tomball, Webster, Baytown, LaPorte, Rosenberg, Hockley, Section 10, Edinburg, Harlingen and Mission.

In order to meet the challenge, the plants had to reduce their energy intensity by at least 10 percent in five years or less.

“THIS PROGRAM IS A WONDERFUL EXAMPLE OF HOW CEMEX INVESTS IN THE FUTURE OF ENERGY CONSERVATION AND HOW WE GO ABOUT CONDUCTING OUR BUSINESS IN OUR COMMUNITIES. THE TEXAS/NEW MEXICO REGION ACTUALLY LEADS THE UNITED STATES IN THE NUMBER OF PLANTS THAT HAVE BEEN CERTIFIED. NOW WE HAVE A TOTAL OF 12, SO THIS IS A CHALLENGE TO MY PEERS AND COLLEAGUES AROUND THE UNITED STATES AND OUR READY-MIX NETWORKS TO GET ON BOARD,” SAID SCOTT DUCOFF, REGIONAL PRESIDENT – TEXAS / NEW MEXICO.”
BLACK MOUNTAIN QUARRY TOUR
Five lucky middle-school students, two teachers and a parent got a firsthand look at mining operations at our Black Mountain Quarry on May 21. The tour started at the bottom of the quarry, where the group watched loaders and haul trucks transport limestone to the primary crusher. They also got a front-row seat to the action in the control rooms, where helpful staff were on hand to answer questions. We love educating young people about our awesome aggregates business.

HONEY BEES FIND A NEW HOME IN FAIRBORN
CEMEX Quality Manager Rusty Strader recently helped a colony of honey bees find a new home at the Fairborn Cement Plant apiary. An Ohio family contacted Strader when they spotted the bees looking for a new hive in their yard. Strader was able coax the bees into an old box hive and relocate them to the plant, where team members created the apiary in April as part of their outdoor learning lab for local students.

WOOD DUCKS AT DEMOPOLIS PLANT
In 2008, the CEMEX Demopolis Wildlife Team, with the help of local high-school students, built several wood duck and eastern blue bird nesting boxes around onsite pond banks. Today, those efforts are paying off in a big way. A team member recently snapped photos of the latest crop of eggs and a momma duck tending to them in the boxes. Excellent work—go Team Demopolis!

TAMPA TEAM SPONSORS AUTISM WALK
Our Tampa Materials Division sponsored and participated in an Autism Walk at Tropicana Field. This was special for the CEMEX team, because they were there to support ready-mix driver Charles Rivera from our Waters Avenue Plant and his son, Aiden, who has autism. Way to come together for a great cause and support our CEMEX family, Team Aiden!

CEMEX USA
CEMEX USA CELEBRATED EARTH DAY ACROSS OUR OPERATIONS. FROM OUR OFFICES, TO OUR PLANTS, TO OUR QUARRIES AND EVERYWHERE IN BETWEEN. HERE ARE SOME OF THE WAYS OUR PEOPLE SHOWED THEIR COMMITMENT TO CONSERVATION AND SUSTAINABILITY.

KUDOS TO THE KENTUCKY COLONELS!
Five members of our Louisville Cement Plant team were recently named “Kentucky Colonels” for their work on the Kosmosdale Oral History Project, an effort dedicated to remembering the history of the plant. The Kentucky Colonels are a philanthropic organization that recognizes individuals who demonstrate outstanding community service. Our newly-minted Kentucky Colonels are: Plant Manager Ricardo Quiroga, CI Manager Shannon Graves, Administrative Assistant Linda Smyth, Environmental Manager Jose Madera and Environmental Coordinator Laura Myers.

OUR OPERATIONAL EXCELLENCE JOURNEY CONTINUES

It has been five months since the rollout of CEMEX Operational Excellence. The model’s four guiding principles are radically changing how we manage and operate our business. The system is enabling improvements in all aspects of the work we do and is starting to impact each and every employee. To change our culture we must continue to progress along the Learn - Use - Live journey.

Many have started to Learn, by attending Leader and Yellow Belt training sessions. The CI Team has shifted its focus from the education of these CI methodologies and principles, to emphasize specific skills and dig deep in how to move us to Using them. For the remainder of the year, we will focus on moving to Use based on the calendar shown here.

Reach out to your CI Leader to gain support along your road to success. Check out the successes we are already experiencing!

MINDSET VICTORVILLE CEMENT PLANT KILN 3 OVERHAUL

The Victorville Cement Plant Kiln 3 is the largest kiln in CEMEX USA, and the second largest kiln in the United States. How does the Victorville team perform an 18-day major overhaul of the kiln? With a Mindset focused on Safety, Process-Oriented Thinking and Seeing Problems as Opportunities. Two teams were formed; one focused on improving safety, the other on the process.

The safety team started by ordering refractory safety nets. Even when it has been cleaned, inspected and tap tested, working under refractory carries a latent inherent risk of material falling. The Victorville team collaborated with their counterparts in the Rugby England Cement Plant to adopt the same safety net system they have installed.

The process team used SMED, Single Minute Exchange of Dies, to reduce the time it takes to complete equipment changeovers. They converted as many changeover steps as possible to ‘external’ (performed on equipment changeovers. They converted as many changeover steps as possible to ‘external’ (performed as far from the hot zone as possible). A team of die casters was added to the process to ensure materials were delivered to the kiln pallets. All team members were trained to anticipate and handle potential issues.

The kiln brick (72 hours down to 36 hours) • Reduced the hours in the critical path by: - Using equipment to perform the demolition in the riser (4 days down to 36 hours) - Using pre-cast of the castable for the nose ring castings (16 hour reduction)

• In the kiln, the team used an excavator to reduce the total amount of some needed to demo the kiln brick (72 hours down to 36 hours)

• Designed a system to remove material from the riser using a conveyor belt system, reducing amount of people needed to remove debris after demolition.

All the actions listed above were attempted by the plant for the first time, and led to very successful equipment overhaul. The kiln is back in operation and supplying the clinker that is required to keep up with customer demand in our sold out market.

JUNE & JULY

The CEMEX Operational Excellence model, Mindset Guiding Principle, Wastes and SS

AUGUST & SEPTEMBER

Leadership, Strategy Deployment, Leader Standard Work and Status Boards

OCTOBER & NOVEMBER

Skillset, Kaizen & Standard Work

DECEMBER

Collaboration, Certification of Yellow Belt, Leader and the Introduction of and New Green Belt Skillsets

RESULTS

1. Double handling of material by Loader = OVERPROCESSING Waste Result: Fuel waste and tear to Loader (adds to maintenance costs)
2. Haul truck driver coming in at the pit to watch and ‘see’ our process of loading and hauling trucks. Here are the some opportunities we identified:

WASTES GOING TO THE GEMBA IN LYLTE CREEK

Identifying Waste is difficult without going to the Gemba, but that is what we did here last week at Lytle Creek Quarry. We met with the Operators out at the pit to watch and ‘see’ our process of loading and hauling trucks. Here are the some opportunities we identified:

1. Double handling of material by Loader = OVERPROCESSING Waste
Result: Fuel waste
2. Haul truck driver coming in at the pit to watch and ‘see’ our process of loading and hauling trucks. Here are the some opportunities we identified:

3. Haul trucks and loaders not operating in Econ. mode = INVENTORY Waste
Result: Fuel waste
4. Overloading trucks (Safety), causing the trucks to dump a portion of their loads at the Primary. This required the haul truck to dump twice (extra wear and tear on the haul truck dump chains) and required a second loader to come up and load hopper = TRANSPORTATION & (excess) MOTION Waste
Result: This increases operating and maintenance and repair costs, additional wear and tear on grizzly (overloading, burying the grizzly).

ORANGE COUNTY 5S TRAINING AND KAIZEN EVENT

The Miami Fleet team began the day with an overview of Continuous Improvement, and continued to conduct the SS module from the Operational Excellence Yellow Belt training. Three teams were formed and assigned a designated zone to tackle: two cabinets of assorted small fittings and tools; a 20’ container full of miscellaneous items and parts. Raul Travieso, Shop Supervisor, was so excited that before we ended the event he approached his supervisor Juan Alvarez with the next project he wanted to tackle with SS (a steel and aluminum materials rack system in need of SS).

After a full day of SS, the results were great and it showed when Raul asked for a picture in front of their work sporting a winning pose. AWESOME!!!

IT IS EVERYONE’S RESPONSIBILITY TO IDENTIFY AND ELIMINATE THE TIM H WOOD WASTES

Now that we have identified the Waste, it is time for us to eliminate it! Stay tuned...
The 2016 Aggregates Global Workshop was held at the Omni Hotel in Houston. Seventy executives from around the CEMEX Global aggregates network were in attendance, sharing best practices, brainstorming ways to improve our network and working together to build a rock solid business.

Special thanks to CEMEX CEO Fernando A. Gonzalez for kicking off the conference with a valuable Q&A session, CEMEX USA President Ignacio Madridejos and CEMEX USA Texas/New Mexico Regional President Scott Ducoff for hosting and all of the guest speakers and panelists for giving their time and expertise to this valuable learning experience.

Colombia
Mexico
France
Germany

La Cueva, Mexico

La Cueva is an architectural project built in a cross-border private conservation area between Mexico and the United States called El Carmen. The El Carmen reserve includes deserts, grasslands, forests, and other ecosystems rich in biodiversity. La Cueva is a 260-square-meter property located several miles from civilization and barely accessible via dirt roads.

El Balseadero Viaduct, Colombia

CEMEX designed and delivered 100% of the ready-mix concrete for one of the most important infrastructure projects in Colombia. The country’s longest bridge is a key element of four new alternative transportation routes that will benefit multiple sectors and make travel shorter in the Huila department.

Lutetia Hotel, France

CEMEX employed a specialty concrete mix that met the weight requirements, while maintaining the right consistency for pumping from a distance. A lighter-weight concrete was needed for the structural work in order to limit overloading and maintain the weight of the original structure.

Leipzig City Tunnel, Germany

Our team in Germany supplied more than 350,000 cubic meters (approximately 458,000 cubic yards) of concrete over five years for the project—from underwater concrete for the tunnel floors to self-compacting architectural concrete for the four underground stations.

Maher Al-Haffar
Executive Vice President of Investor Relations, Corporate Communications and Public Affairs

“By exposing CEMEX’s global successes to our local markets, we can strengthen our brand in a way that will fuel more local business and create a stronger global identity.”

Our Shareholders

Maher Al-Haffar
