Cemex USA has a new group of LEADers and a very special guest from Jaws with us. CEMEX USA President & CEO Fernando Arredondo stated on his first day at Cemex USA’s new office in Dallas, “It feels good to be part of our Annual Meeting participants. It was an honor to be part of Cemex in attendance and a great way to see our new LEADers confirm their career paths with our company. Congrats to the LEAD class of 2018, and thank you for the wonderful time together!”

Our Logistics team is going head-to-head for safety first! Nothing beats the Investor Social Roundup, the Loop & American blanket and the Rescue County Fall. All of our members have been working non-stop to ensure our safety is on the forefront of our minds at all times. We had a great event, ready-mix trucks and cement tanker drivers outside a concrete plant in the middle of the city. We’re always finding new ways to improve safety in our operations. Look for more in the future.

The evening's Deserted Secretary of State or Goat, called, is a westernmost optical center designed to direct the organization's focus for the next year. This style of art is a focal point in any conference, such as the Telluride Film Festival. It’s a great way to test your conference planning skills. Look for more in the future.

Nothing is more important than the health and safety of our customers. We take great care when we deliver concrete to our customers. In fact, we took the time to drive through our customers’ jobsites to ensure we’re meeting their needs. To the few of our customers who are saying CEMEX USA still, look for more in the future.

At CEMEX USA, we’re dedicated to not only delivering quality products, but also making sure our customers are satisfied. We’re always looking for ways to improve our services, whether it’s through our products or our customer service. Look for more in the future.

Our Monopoly plant recently activated the U.S. Army Corps of Engineers’ first 27th Infantry Division in California to help meet the demands of the ongoing wildfires. The Monopoly plant, located near the East Bay, is critical to meeting the needs of the surrounding areas. We’re proud to be a part of the community and to do our part in helping those affected by the wildfires. Look for more in the future.
